

BREAST THERMOGRAPHY

A "do no harm" approach to breast screening

THERMOGRAPHY	MAMMOGRAPHY
<ul style="list-style-type: none"> • Pain-Free 	<ul style="list-style-type: none"> • Often Painful For Many Women
<ul style="list-style-type: none"> • Radiation-Free 	<ul style="list-style-type: none"> • Uses Radiation Which Can Damage DNA • May Be A Contributing Factor To Increasing Rates Of Certain Types Of Breast Cancer
<ul style="list-style-type: none"> • Compression-Free • Nothing Touches Your Body • Totally Non-Invasive 	<ul style="list-style-type: none"> • Potential To Rupture Tumors Causing Cancer To Spread • Can Damage Implants - Not As Effective For Women With Implants
<ul style="list-style-type: none"> • Detection 5-10 Years Earlier Than Mammography 	<ul style="list-style-type: none"> • Tumor May Be Present For 5-8 Years Before It Is Detectable • Not Effective For Fast Growing Tumors
<ul style="list-style-type: none"> • FDA Approved – 100% Safe 	<ul style="list-style-type: none"> • FDA Approved – Can Damage Breast Tissue
<ul style="list-style-type: none"> • Standard Images Include Lymph Nodes In The Neck, Breasts & Under Arms 	<ul style="list-style-type: none"> • Unable To Include Lymph Nodes
<ul style="list-style-type: none"> • Can Detect Inflammatory Breast Cancer 	<ul style="list-style-type: none"> • Can Detect Micro-Calcifications
<ul style="list-style-type: none"> • Safe For Teens & Young Women With Breast Concerns 	<ul style="list-style-type: none"> • Not Recommended For Women Under 40 Due To Radiation Concerns
<ul style="list-style-type: none"> • 90% Accuracy Rate 	<ul style="list-style-type: none"> • 80-85% Accuracy Rate
<ul style="list-style-type: none"> • A Test Of Physiology (Function) 	<ul style="list-style-type: none"> • A Test Of Anatomy (Structure)
<ul style="list-style-type: none"> • Fewer Unnecessary Biopsies 	<ul style="list-style-type: none"> • Can Result In Unnecessary Biopsies For Women With Dense & Fibrocystic Tissue
<ul style="list-style-type: none"> • Scans Are Read & Interpreted By Thermologists/MD 	<ul style="list-style-type: none"> • Scans Are Read & Interpreted By Radiologists/MD
<ul style="list-style-type: none"> • Ideal For ALL Women – Especially Those With Dense Breast Tissue, Fibrocystic Breasts, Implants Or Who Have Had Mastectomies Without Reconstructive Surgery. • A Useful Adjunct To Other Screening Methods 	<ul style="list-style-type: none"> • Not An Option For All Women – Due To Age, Mastectomy Without Reconstructive Surgery, Prior Radiation Exposure
<ul style="list-style-type: none"> • Safe For Nursing Mothers With Breast Concerns 	<ul style="list-style-type: none"> • Not Safe For Nursing Mothers
<ul style="list-style-type: none"> • No Doctor Referral Required 	<ul style="list-style-type: none"> • Doctor Referral Required
