Understanding of Services Provided By DITI Imaging

I _____ fully understand the following:
(Please Print Your Name)

- DITI Imaging does **not** diagnose or treat any disease or health condition. If I have any disease or abnormal health condition, I must seek qualified medical advice from a licensed physician.
- DITI Imaging is dedicated to help their clients find a path to better health with an emphasis on education and self-care. My interest is to educate myself in achieving the best health possible.
- Digital Infrared Thermal Imaging (DITI) is an **adjunctive screening** and is not designed to replace current screening methods.
- Digital Infrared Thermal Imaging, like a mammogram or sonogram, is not 100% effective. A suspicious mass may warrant a biopsy.
- I have chosen to have this type of screening procedure for one or more of the following reasons:
(initial those that apply)

- _____ I wish to minimize my exposure to radiation.
- _____ I am looking for methods of possible earlier detection of any abnormalities.
- _____ I do not desire to have a mammogram.
- _____ I have had a mammogram before and chose not to have another.
- _____ I have had a mammogram and desire to use this procedure in between checkups.

- DITI is appropriate for ALL women, but especially for younger women between 25 and 50 whose denser breast tissue makes it more difficult for a mammogram to pick up suspicious lesions. This can provide a "clinical marker" to the doctor or mammographer that a specific area of the breast needs particularly close examination.
- What I learn from DITI Imaging and this procedure may not be universally accepted. Certain agencies and other health authorities may not agree with an approach where the client must be responsible for developing and maintaining their own health.
- The reports/images provided are **not** designed for self-diagnosis and should be reviewed with a Health Care professional.

I have read and understand what is printed above.
